Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a method of transmitting physical channels, a downlink data transmits from a base station to at least a mobile station, comprising: determining a non-orthogonality among each downlink physical channel; differently deciding each transmission starting point of each physical channel from the base station, if the non-orthogonality is determined to exist among the physical channels; transmitting the downlink data through each physical channel having a different transmission starting point from the base station; and ***transmitting downlink data through other ones of the physical channels at a same transmission starting point if orthogonality exists among the other ones of the physical channels***, as recited in independent claims 1, 3, 13 and 20.

2. The prior art also does not teach or fairly suggest a method of transmitting data on physical channels using at least one scrambling code in a base station, comprising: scrambling and transmitting first data on a first data channel from the base station by a first scrambling code; scrambling a transmitting second data on a second physical channel from the base station by a second scrambling code; scrambling a transmitting third data on a third physical channel from the base station by a third scrambling code; and wherein a chip synchronization on the first physical channel and on the second physical channel is not made, and ***chip synchronizing occurs between the second physical channel and third physical channel***, as recited in independent claim 23
